

Cultural Interactions

A responsible citizen understands the various cultural influences that affect our lives, nation, and world today. You will choose members of one cultural group that reside, or have resided, in two regions or countries and analyze the contributions they have made, the economic success they have had, and the level of social and political participation they have attained.

Your Task

In a cohesive paper or presentation, you will:

- Introduce the concept of how cultural influences affect our lives.
- Provide background on the cultural group by explaining how people from that group have come to live in two places.
- State a claim about why the people in one subset of the cultural group fared better in one region over another.
- Provide reasons for your claim, supported by evidence, including:
 - A comparison of the cultural group's economic success in each region/country, with one or more similarities and/or differences.
 - A comparison of the cultural group's political status in each region/country, with one or more similarities and/or differences.
 - A comparison of the cultural group's social conditions in each region/country, with one or more similarities and/or differences.
- Cite specific textual evidence from at least three credible sources that provide relevant information.
