Additional forms as required by Enumclaw Public Schools

Additional forms as required by the state of Washington

First class assignment

Overview

Graduation Alliance (previously known as the American Academy) provides an innovative dropout recovery program in partnership with public school districts. Once the school district authorizes Graduation Alliance's Dropout Recovery Program, we request the district's list of kids who are no longer attending school. Then our Recruiting Team gets to work. Our on-the-ground mentor assists with recruiting and holds local in-person meetups. If your students need computers to complete their school work, we provide them. Graduation Alliance handles the work - from recruiting, to enrollment, to course registration. Our state-licensed teachers work with your students at a course level, while our mentors work with your students at a program level. All efforts are backed by our student services and support team and the systems we've built to run our own school.

Graduation Alliance is an online high school and educational services provider serving students in 43 states and 8 countries. The school has earned full regional accreditation from the Northwest Accreditation Commission, and offers more than 200 online courses, all supported by state-licensed teachers. We apply online learning to solve real problems faced by schools and school districts every day.

Our mission is to help students who have dropped out or who are at risk of dropping out of high school to complete their high school diplomas online. We partner with local school districts to recover lost students and put them on the path to success.

One key element to online learning success is our recognition that online learning requires timely intervention and direct human support; we balance flexibility with accountability and support.

Online learning requires and helps build self-management and self-directed learning skills. It's not for everyone, but for many it's not only a viable approach but it's one that makes sense given the student's life circumstances.

We know from experience - we operate our own online high school and work directly with students across the country - that with the right support structure students can thrive in an online learning environment. We provide on-the-ground mentors who know the kids that they work with and know the community in which they work. Our mentors are available to make sure our students have the support, tools, and guidance they need to truly succeed. While technology (the online learning environment) is the enabler, it's the human element (the mentors and our student support teams) that drives success.

Subjects:

- Arts
- Business
- Language Arts
- Lifeskills-Health
- Mathematics
- Science
- Social Studies
- Technology
- World Languages

Levels:

- Credit Recovery
- Standard

Students

Graduation Alliance partners with districts in both their dropout recovery and dropout prevention efforts.

Graduation Alliance's Dropout Recovery program focuses on bringing dropouts back into their resident district with a full-time online program. Dropout Recovery is intended for kids who have been out of school for months - and in some cases, years - because life got in their way: we generally work with teen parents, kids who are working to support themselves or their families, kids who are medically fragile, kids who were bullied or had social issues in the traditional school environment, or kids who have been asked to leave school as a result of disciplinary action.

Graduation Alliance also offers Courses On-Demand, which allows districts to offer access to individual courses to students in need of credit remediation, acceleration, or other learning options. The Courses On-Demand program is designed to serve students who are concurrently attending traditional school programs.

Student-Teacher Contact Requirements

Graduation Alliance supplies an asynchronous learning environment. Teachers provide feedback to students through the learning management system and are available to student for synchronous remediation and enrichment.
