

ATHLETIC INTERESTS AND ABILITIES DISTRICT WORKSHEET

In step 1, the district gathered information from each school on the participation rates and levels of competition for boys and girls. Now, the district can use this worksheet to compile information and determine whether there is a disparity in participation rates and enrollment rates along sex lines. The chart allows you to separately list and calculate totals and percentages for middle/junior high schools, for high schools, and for the district as a whole. Then, you should review the questions we have provided to evaluate any disparities in participation rates and levels of competition. Answering these questions will enable you to complete the certification form and to identify steps you may need to take to ensure equal opportunity in interests and abilities.

Districtwide Data on Participation and School Enrollment Rates

Middle/Junior High School	Number of Males Who Turned Out	Male Participants	Males Enrolled	Number of Females Who Turned Out	Female Participants	Females Enrolled
Middle/Junior High School Total and Percent						

High School	Number of Males Who Turned Out	Male Participants	Males Enrolled	Number of Females Who Turned Out	Female Participants	Females Enrolled
High School Total and Percent						
District Total and Percent Overall
