

Want to secure your future?

Start learning high-demand job skills in high school

Some jobs are growing fast and can never be outsourced overseas. They need good employees *just like you.*

Career and Technical Education classes teach skills in these growing professions:

- **Healthcare/Medicine** – Internists, nurses, veterinarians, technical assistants
- **Construction** – Carpenters, architectural/civil drafters, building insulators/weatherizers, green energy designers/workers
- **Computers** – Software engineers, system administrators, data and system analysts
- **Business/Management** – Labor relations experts, statisticians, database managers
- **Science** – Biology technicians, agricultural engineers, research analysts
- **Human Services/Public Protection** – Homeland Security analysts, psychologists, mental health counselors
- **Mechanics/Engineering** – Civil engineers, material scientists, industrial and aircraft mechanics, green technology engineers and scientists

Why Career and Technical Education?

- Tens of thousands of Americans are enrolling in two-year programs and apprenticeships to acquire employable skills.
- Start developing real-life career skills today – in middle and high school – and you'll be perfectly positioned for the jobs of tomorrow.

“Students who take CTE classes as well as academic classes in high school are better prepared for the working world, meet performance requirements of more employers, and earn higher salaries.”

*– Eleni Papadakis, Executive Director
Washington Workforce Training
and Education Coordinating Board*
