CACFP Grain Requirements – Rule of Three
CACFP operators often shop in retail environments and may not have access to manufacturers’ product formulation statements or products specially formulated for School Meal Programs. Because of this, USDA came up with ways to identify if a grain meets Whole Grain-Rich Requirements.

**Requirements:**
- The first ingredient (or second after water) must be whole grain.
- The next two grain ingredients (if any) must be whole grains, enriched grains, bran, or germ.

**Notes:**
- **Any non-credible grain ingredients** (flours that are not enriched or whole) cannot be one of the first 3 grain ingredients. See [Whole and Enriched Grains Reference Sheet](#) for a list of non-creditable grains.
- **Disregard Ingredients** that are labeled as 2 percent or less of product weight and grain derivatives (see the [Whole and Enriched Grains Reference Sheet](#) for a list of disregarded ingredients).
- **Mixed dishes** (examples: pizza crusts or tortillas for burritos)
  - The first grain ingredient must be whole grain and the next two grain ingredients (if any) must be whole or enriched grains, bran, or germ.
- **Ready-to-eat breakfast cereals**
  - If the first grain ingredient is a whole grain and the cereal is fortified, then it meets the whole grain-rich criteria.
  - Any second or third grain ingredients do not need to be considered.
  - All cereals need to meet the sugar requirement of no more than 6 grams of sugar per dry ounce, even if it is whole grain rich.

Example:
Ingredients: “Water, **whole wheat flour**, yeast, sugar, **enriched white flour**, wheat gluten, **brown rice flour**, salt.”
- The first ingredient after water is a whole grain.
- The second grain ingredient is an enriched grain.
- The third grain ingredient is a whole grain.

This product passes the **rule of three test**.
