

# NCLB Compliance Report 2008: Washington Schools in "Improvement" Status PRELIMINARY REPORT

Since the passage of the No Child Left Behind Act in 2001, the federal government has assumed a stronger role in education. This law clearly sets forth an expectation that all children achieve their state's academic standards and that schools, districts and states be more accountable for student learning. Under No Child Left Behind, schools and districts that receive federal education dollars (Title I) and miss making achievement goals, commonly referred to as Adequate Yearly Progress (AYP), face specific consequences. In our state, reading and math scores from the Washington Assessment of Student Learning are used to calculate AYP.

Schools are expected to make AYP in up to 37 different categories, and districts are evaluated in as many as 111 categories, or "groups" in the table that follows (e.g., "# of 'YES' groups"). Any school not making AYP for two consecutive years the same subject area (such as reading in 2007 and 2008) is identified for "improvement" status. And until AYP is achieved in every category for two years in a row, schools continue to be identified as needing to improve. Making it one year and then missing the next means a school stays on the federal "improvement" list and restarts the two-year cycle of making AYP.

This **preliminary report** includes the names of all schools identified for federal "improvement" based on assessment data analyzed by OSPI. Many schools receive federal Title I education funds and therefore face federally-mandated consequences if they are in "improvement" status. Each school's Title I status is provided below.

While federal law may require our state to apply a specific definition of "needs improvement", our education system is based on the premise that *all* schools and districts strive to make continuous improvements to help students experience academic success.

**OSPI will issue a final report detailing the AYP status of all schools and districts later this fall. Until that release, this list is considered to be preliminary.** Those identified today have an opportunity to appeal their AYP determination and change their status.

### ***Schools Exiting "Improvement" Status***

A total of 4 school buildings made adequate yearly progress for their second consecutive year and are exiting school the federal improvement list: McKinley (Tacoma), Visions-Seamar Youth Center (Bellingham), Compass High School (Grandview) and Scriber Lake High School (Edmonds).

# NCLB Compliance Report 2008: Washington Schools in "Improvement" Status PRELIMINARY REPORT

## Schools in Improvement

### Step 1, 390 schools

At the start of this school year, Title I schools in this category must notify the families of enrolled students about the opportunity to transfer their child to another school in the same district that is not in school improvement. Transportation costs (within federal parameters) will be covered by the school for families exercising this option.

### Step 2, 50 schools

Title I schools that have reached Step 2 must continue to offer school choice and add the option for low-income students to receive tutoring services from an OSPI-approved supplemental service provider. Again, these options are only required to be offered by schools that receive Title I funds.

### Step 3, 95 schools

At this point in school improvement, federal law expects districts to take a more direct role in addressing the academic struggles in a particular Title I building. S. D.s must take "corrective action," and they can choose from a number of options focused most often on curriculum and instruction changes that will improve student learning. These schools must continue to provide school choice options and supplemental services.

### Step 4, 29 schools

Schools in this phase must continue school choice and tutoring options as well as follow the S. D.'s chosen course of "corrective action." Working alongside the district, the school must also plan for "alternative governance" that could be implemented in the 2009-010 school year *if* the school continues to miss AYP in the same column (i.e. reading proficiency).

### Step 5, 64 schools

In this step, the school is required to institute "school restructuring" as defined in the school's restructuring plan. The school must provide documentation that at least one of the following actions has been taken:

- Replace school staff members, which may include the school principal, who are relevant to the school's inability to meet standards.
- Enter into a contract with an entity with a demonstrated record of effectiveness, to operate the school.
- Implement other restructuring activities that are consistent with the principles of restructuring.

The district must continue to provide technical assistance that emphasizes (a) the importance of improving instruction by using strategies grounded in scientifically-based research so that all students achieve proficiency in the core academic subjects of reading and mathematics, and (b) the importance of analyzing and applying data in decision-making. The school must also continue to offer public school choice and supplemental services to all eligible students.
