# EXECUTIVE SUMMARY

With the advent of new federal and state accountability systems, collecting and providing accurate information about high school graduation and dropout rates has become increasingly important. The stakes associated with large-scale assessments can have an adverse effect on these indicators.

The Office of Superintendent of Public Instruction (OSPI) receives data at the end of the year from school districts on the status of their students in grades 9–12. Information provided in this report is based on those data and reflects changes in the data made by districts after they reviewed an earlier version of this report.

In the 2000-01 school year, a total of 246 districts reported Grade 9–12 students in 676 schools. These students fall into four broad categories: (1) *completed*, which includes those who graduated with a diploma or finished their schooling with a GED, IEP, or adult diploma; (2) *dropped out*; (3) *continuing* their schooling; and (4) *unknown*. The percentage of students in each of these categories can be calculated in different ways, which yields different results. Thus, it is important to consider the methods used and definitions when analyzing these rates and making comparisons across schools, districts, and states.

In the past, OSPI reported limited graduation and dropout statistics. This report substantially expands OSPI's reporting on these statistics, which reflects the agency's commitment to provide more complete and meaningful information to educators and other stakeholders. For the first time, this annual report provides:

- More complete analyses of the data collected from districts, including statewide results by race/ethnicity and gender, longitudinal analyses for the cohort of students in the Class of 2001 and reasons why students dropped out;
- More accurate rates by using different methods of calculation; and
- Results at the school level as well as district and county rates that have been reported in the past.

OSPI believes that moving to a more meaningful method of calculating this information will encourage efforts that will improve graduation rates, reduce dropout rates, and improve the accuracy of all data reported.

Grade 12 Graduation/Completion Rates Of the Grade 12 students, 80 percent either graduated or completed school in another manner in 2001. This rate applies to all Grade 12 students, regardless of when they began their high school career. Of the students who began high school in the fall of 1997 (i.e., Class of 2001 cohort), about 72 percent graduated “on-time,” or in the traditional 4-year period. Many students continue their education after attending four years of school.

Dropout Rates For Grades 9–12 statewide, a total of 15,811 students dropped out of school during the 2000-01 school year. This represents an “annual” dropout rate of 5 percent, which is based on the number of all students enrolled in the four grades during the year. Asian students had the lowest annual dropout rate (3.8%) while American Indian students had the highest annual dropout rate (10.2%). Males drop out at a higher rate than females.

Students drop out of school at different stages of their school experience. The largest percentage of students dropped out in Grade 12. Of the Class of 2001, approximately 18 percent dropped out over the 4-year high school period. Some Class of 2001 students continued in school after the 4-year period. Of the students who dropped out in Grade 12, a very large percentage (43%) left school even though they had attended four years of high school. It should be noted that the status of roughly 5–8 percent of students is unknown. Some may have dropped out or graduated elsewhere.

## INTRODUCTION

Information about high school graduation and dropout rates will become increasingly important with the advent of new federal and state accountability systems. Increased testing and the stakes associated with those assessments can have an adverse impact on these indicators. Thus, more scrutiny will be paid to this information in the years to come.

Graduation and dropout rates can be calculated in a number of ways. An annual (also called “event”) dropout rate is the percentage of students who dropped out of school in one year without completing an approved high school program (e.g., GED or IEP). The high school dropout rate for grades 9–12 is based on the sum of dropouts and enrollments across these grades. A cohort dropout rate is based on the percentage of students who began in grade 9 in a given year but dropped out of school before receiving a diploma or completing a state or district approved program.

RCW 28A.174.010 requires school districts to account for the educational progress of each of its students in Grades 9–12. The legislative reporting requirement made it necessary for the Office of Superintendent of Public Instruction (OSPI) to collect a record with several data elements for every student in Grades 9–12. These data are collected each year on Form P-210. This form is used by districts to provide information to OSPI on the status of these students, including the number of students who dropped out, completed school via graduation and other means (e.g., GED), transferred out of the school, and the reasons why students dropped out. The reporting period for the P-210 used for this report is defined as the first day of school in the fall of 2000 to the day before the first day of school in the fall of 2001. The collection of this information will expand to Grades 7–8 in the future due to new federal requirements. In school year 2000–01, a total of 246 districts reported Grade 9–12 students in 676 schools.

The data provided in this report should be used with caution. Districts were to report their data to OSPI by October 15, 2001. However, some districts provided incomplete or inaccurate data. For example, 14 districts reported changes in their number of graduates district-wide after examining preliminary data prepared by OSPI in May 2002. Since these districts did not make changes to the P-210 nor indicate which schools the students attended, we did not include these changes in this report. Other districts provided changes to the data after examining earlier versions of this report, and these changes are reflected in this document. In some cases, a K–8 district served students in the high school grades through a special program. Moreover, some district totals include the data from institutions. Due to these and other limitations in the data reported to OSPI, and the fact that *OSPI does not verify the accuracy of the data provided by districts*, any cohort rate should be considered an estimate. In some cases, the cohort rates are clearly incorrect.

### **Contents of This Report**

To ensure consistency of reporting across states, the federal government asks each state to calculate and report the annual dropout rate using the number of students enrolled in October of the school year as the denominator, even though more students may be served during the year. Thus, a school could theoretically have more dropouts or graduates than those served in grade 12 because of students who transferred into the school after October and then drop out or graduate. Nevertheless, this is the method OSPI has used to calculate and report these rates in the past, and this report uses this calculation method.

In addition to the district-level calculations using the same methods as in past years, this report provides the results of other analyses not conducted previously. **Additional state-level information** is provided, such as results by race/ethnicity and gender, for the Class of 2001 cohort, the ways students completed their education, and the reasons given for dropping out of school. In addition, we are providing for the first time **school-level data** as well as district-level summaries. The federal government will require school-level data to be reported in the future, and reporting these data this year will help schools and districts analyze the accuracy of their data. Finally, analyses based on the **total number of students reported on Form P-210** are provided. Since Form P-210 data are used as the numerators of the rates calculated for the federal government, it makes sense to determine rates based on these data rather than using October 2000 enrollment data (based on Form P-105) as the denominator (minus students who transferred out of the school/district to avoid counting the same student twice). The results of these analyses provide more accurate information regarding the status of students in Grades 9–12 and are found in Sections B, D, E and F. Future reports will include statewide trends based on data from previous P-210s.

This report reflects one formatting change. District and school information is presented alphabetically by district name rather than by county. County totals are provided separately in Sections C and D.

### **Definitions**

The definitions used in Form P-210 and in this report conform to the federal government definitions and are as follows:

**Graduated** A student is considered to be graduated if he or she received a high school diploma during the reporting period (including summer program). This does not include students who completed another type of school program (i.e., GED, IEP, or adult diploma).

**Dropout** A dropout in this report is defined as a student who leaves school for any reason, except death, before graduation or completion of a program of studies and does not transfer to another school. An individual is a dropout whether dropping out occurs during or between regular school terms. A student who leaves during the year but returns during the reporting period (including summer program) is not a dropout.

**Unknown** If a student leaves the district, does not indicate he or she is dropping out, and the district is not contacted by another school requesting student records (unconfirmed transfer), the student's enrollment status is reported as "unknown." As of the 1998-99 P-210 collection, districts were required to report students that leave with an unknown status until (1) they return, (2) a request for student records is requested, or (3) until their class graduates (rather than until the student turned 21 years of age, as previously required).

**Class of 2001** A student who is reported to have an expected graduation year of 2001 is considered in the Class of 2001. This graduation year is assigned at the beginning of Grade 9 (fall of 1997) and is not to be changed unless an error was made during the initial assignment of the graduation year. Students who transfer into the district after Grade 9 may be assigned a graduating class based on the level of credits earned.

## STATE SUMMARY

Of the Grade 12 students who started the 2000-01 school year, 80 percent either graduated or completed school in another manner (i.e., via a GED, IEP, or adult diploma). Another 7 percent dropped out of school, while 8 percent continued their education. The status of 5 percent was unknown. (Students who transferred out of a school are not included in these calculations to avoid counting the same student twice.) These rates apply to all grade 12 students, regardless of when they began their high school career. Of the students in the Class of 2001, about 72 percent graduated “on-time,” or in the traditional 4-year period beginning in the fall of 1997.

For Grades 9–12 statewide, a total of 15,811 students dropped out of school during the 2000-01 school year. This represents an annual dropout rate of 5.1 percent as calculated by the method used to report the dropout rate to the federal government. However, a more accurate annual dropout rate is 5.0 percent, which is based on data collected on all students enrolled during the year. Asian students had the lowest annual dropout rate (3.8%) while American Indian students had the highest annual dropout rate (10.2%). Males dropped out at a higher rate than females.

The largest percentage of students dropped out of school in Grade 12. However, students drop out of school at different stages of their school experience. An estimated 18 percent of the Class of 2001 dropped out of school over their four-year high school term (from fall 1997 to spring 2001). A large percentage of Grade 12 dropouts left school even though they had attended four years of high school.

**Table 1: State Summary for Grades 9–12, School Year 2000-2001**

<b>Grade</b>	<i>October 2000 headcount (P-105)</i>	Total headcount enrollment (P-210)	Completed (P-210)	Continuing in school (P-210)	Transferred out (P-210)	Dropout (P-210)	Unknown/ deceased* (P-210)	Headcount enrollment minus transfers (P-210)	Annual dropout rate (P-210)
All grades	310,403	361,820	59,646	225,361	43,189	15,811	17,813	318,631	5.0%

<b>Ethnicity (all grades)</b>									
Amer. Indian		10,737	1,235	5,816	1,838	911	937	8,899	10.2%
Asian/Pacific Is.		27,222	4,851	17,181	3,418	906	866	23,804	3.8%
Black/African Amer.		19,176	2,361	10,074	4,439	1,067	1,235	14,737	7.2%
Hispanic		32,298	3,994	18,446	4,628	2,277	2,953	27,670	8.2%
White		272,210	47,175	173,734	28,850	10,640	11,811	243,360	4.4%
Unknown		177	30	110	16	10	11	161	6.2%
<b>Gender (all grades)</b>									
Female		174,589	30,143	109,524	20,122	6,659	8,142	154,467	4.3%
Male		187,231	29,503	115,837	23,067	9,152	9,671	164,164	5.6%

\* A total of 143 students died during the reporting period. Their inclusion in the unknown category does not materially change the level or percentage of unknown students.

## Grade 12 Graduation and Completion

Of the Grade 12 students who began the year, 83.6 percent either graduated or completed school in another manner (i.e., GED, IEP, adult diploma). A total of 56,277 Grade 12 students received a high school diploma in school year 2000-01 (see Table 2), resulting in a graduation rate of 82.1 percent based on a denominator of the October grade 12 enrollment (P-105). An additional 1,057 students (1.5 percent) completed school in another manner.

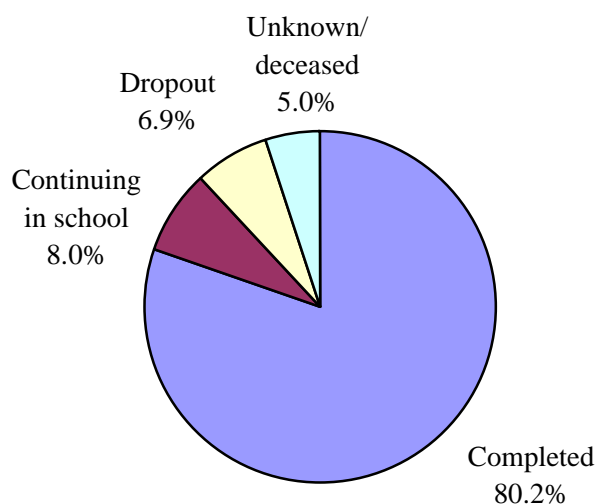

Using the *total* number of Grade 12 students reported on Form P-210 (78,558) *minus* those who transferred out of the schools (7,059) as the denominator, the graduation rate was 78.7 percent, and an additional 1.5 percent completed school in another manner, for a total completion rate of 80.2 percent (see Figure 1). Asian and white students had much higher graduation and completion rates than the other three minority groups (see Table 3).

These rates do not take into account other factors that influence the graduation rate for this cohort of students. First, many students in the cohort dropped out of school before entering Grade 12, which inflates the graduation rate. Second, 8 percent (5,699 students) were continuing in school and may eventually graduate or complete their course of study. Finally, some districts did not provide accurate data to OSPI.

**Table 2: Students Who Completed School in 2000-01**

Grade	Graduated	GED	IEP	Adult Diploma	Total
All grades	56,627	2,626	158	235	<b>59,646</b>
Grade 12	56,277	765	135	157	<b>57,334</b>
Grade 11	295	822	8	62	<b>1,187</b>
Grade 10	38	688	8	10	<b>744</b>
Grade 9	17	351	7	6	<b>381</b>

**Figure 1: Status of Grade 12 Students**

Note: This figure is based on P-210 data and excludes students classified as transferred out of a school. Students that transfer out of one school and into another would be counted in the school where they last attended.

**Table 3: Grade 12 Graduation & Completion Rates, by Race/Ethnicity**

Ethnicity	Headcount enrollment (P210)	Transferred out	Headcount minus transfers	Completed	Completion Rate	Graduated	Graduation Rate
Total All	78,558	7,059	71,499	57,334	80.2%	56,277	78.7%
Amer. Indian	1,930	258	1,672	1,134	67.8%	1,097	65.6%
Asian/Pacific Is.	6,373	624	5,749	4,755	82.7%	4,712	82.0%

White	60,205	4,767	55,438	45,516	82.1%	44,765	80.7%
Unknown	36	1	35	28	80.0%	28	80.0%

On-Time Graduation and Completion Rates The above analyses considered all students who graduated or completed their schooling in 2001. This includes students who may have completed their schooling in less or more than four years. The results would be different if the analyses considered only students with an expected graduation year of 2001. These students would have started Grade 9 in the fall of 1997 and were expected to graduate “on-time,” i.e., in a 4-year period.

Based on district reports, about 72 percent of the *Class of 2001* graduated “on-time” (see Table 4). Of the 73,213 students in the class, 73.4 percent had completed their education by 2001. These rates are about 7 percentage points below those shown above and are a more accurate depiction of graduation and completion rates for the state. Of the remaining students, 10 percent were continuing their schooling, 9 percent had dropped out, and 7.6 percent had an unknown status or were deceased. (These rates exclude transfers to avoid counting the same student more than once.) District and school on-time graduation and completion statistics are provided in Sections E and F. Table 5 shows the ranked results for the 22 districts with at least 1,000 students in the class. Students in these districts represent 42 percent of the total Class of 2001. Table 6 provides results for the cohort by race/ethnicity and gender. Asian students have the highest graduation and completion rates; American Indian and Hispanic students have the lowest rates. Females have higher graduation rates and lower dropout rates than males.

**Table 4: Class of 2001 Cohort Results**

	Completers			Continuing	Dropouts	Unknown/ Deceased	Total
	Graduated	Other Completers	All Completers				
Students	52,606	1,155	53,761	7,297	6,585	5,570	<b>73,213</b>
Percent	71.9%	1.6%	73.4%	10.0%	9.0%	7.6%	<b>100.0%</b>

## Dropouts

In school year 2000-2001, a total of 15,811 students dropped out of grades 9–12 in Washington. This number is based on student-level records submitted to OSPI on Form P-210. This number yields an **annual dropout rate of 5.1 percent statewide**, based on grade 9–12 enrollment of 310,403 in October 2000. This rate is used when reporting data to the federal government. A more accurate rate uses the *total* number of students reported on Form P-210 *minus* those who transferred out of the schools as the denominator. This method results in a **more accurate annual dropout rate of 5.0 percent**. Grade 12 experienced the largest annual dropout rate. Asians and Pacific Islanders had the lowest dropout rate. (See Figures 2 and 3, which are based on P-210 data minus transfers).

**Figure 2: Percent Dropouts, by Grade**

**Figure 3: Percent Dropouts, by Race/Ethnicity**

Note: The percentages in the above figures are based on P-210 data for school year 2000-01 and exclude from the calculations the number of students classified as transferred out of a school.

Estimating the Cohort Dropout Rate Large numbers of students drop out during their school experience. Although Grade 12 experienced the largest percentage of dropouts, many students drop out in earlier grades. Statewide longitudinal data were not available for analysis, nor was a tracking system in place to identify where these students enrolled during the course of their school experience. However, a cumulative rate for students in the class of 2001 can be estimated by calculating a “synthetic cohort dropout rate.” This rate is based on the available annual dropout numbers and assumes that the conditions producing those rates remain constant over a four-year period. Thus, the number of students who dropped out across the four grades (15,811) is compared to the number of students who were enrolled in school at the beginning of Grade 9 (87,322). Thus, the **estimated synthetic cohort dropout rate for the class of 2001 is 18.1 percent**. This rate is probably fairly accurate because of two offsetting forces. On the one hand, the rate probably overestimates the actual percentage because there was a 1.4 percent growth in the number of K-12 students enrolled in public schools between October 1997 and October 2000. On the other hand, the rate underestimates the actual percentage because it does not include students who were listed as “unknown” but may have dropped out of school at some point.

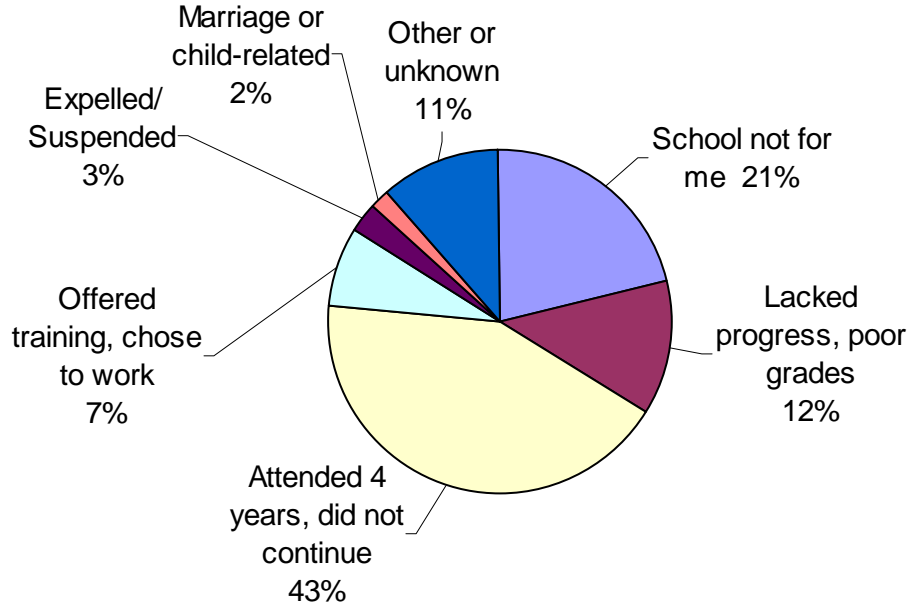

In the Graduation and Completion section above, a 9 percent dropout rate was shown for the *Class of 2001*. This rate is half the estimate of 18.1 percent noted above. More analysis is necessary to determine why these rates vary so much. The size of the “continuing” and “unknown” categories for the *Class of 2001* (10.0 % and 7.6%, respectively) are above the expected rates, and many of these students may be considered dropouts when districts report the following fall. Thus, when these students are considered, the 18.1 percent noted above is not unrealistic and may be higher.

Reasons for Dropping Out Students gave a variety of reasons for dropping out of school (see Table 7 and Figure 4). A largest percentage of students dropped out because they had not or were not making sufficient academic progress in school. A very high percentage (43%) of Grade 12 students dropped out, even though they had attended high school for four years.

**Table 7: Reasons Given for Dropping Out, School Year 2000-01**

Grade	Expelled/ Suspended	Attended 4 years, did not continue	Lacked progress/ poor grades	School not for me/ stayed home	Married, needed to support family	Pregnant or had a baby	Offered training, chose to work	Other or unknown	<b>Total</b>
All grades	1,165	2,415	2,647	5,517	119	331	1,490	1,975	<b>15,811</b>
Grade 12	147	2,103	603	1,059	26	64	360	540	<b>4,922</b>
Grade 11	219	176	603	1,323	19	90	422	524	<b>3,407</b>
Grade 10	318	84	628	1,327	33	81	401	462	<b>3,382</b>
Grade 9	481	52	813	1,808	41	96	307	449	<b>4,100</b>

**Figure 4: Dropout Reasons Given, Grade 12**

Many students continue their education after the normal 4-year period rather than drop out of school. Districts reported 10,881 students who had an expected year of graduation prior to 2001 (see Table 8). Over half of them either completed their education or are continuing their education.

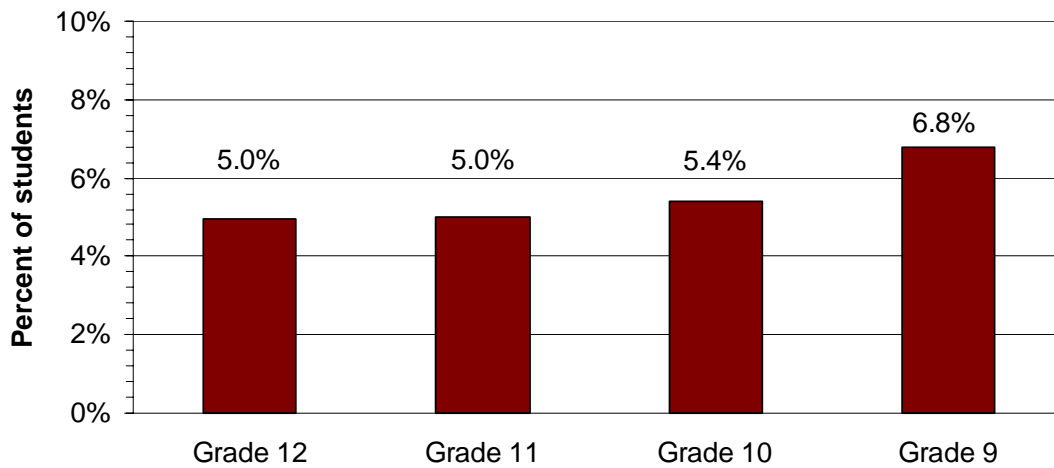

**Table 8: Results from Classes Prior to 2001**

	1998 or earlier/ unknown	1999	2000	Total Prior to Class of 2001	Percent of Total
<b>Continuing</b>	141	454	1,751	2,346	21.6%

<b>Total</b>	<b>621</b>	<b>1,807</b>	<b>8,453</b>	<b>10,881</b>	

## Unknown

The status of 5.7 percent of all the Grade 9–12 students was unknown, using the October 2000 headcount as the denominator (P-105). Using the *total* number of students reported on Form P-210 *minus* those who transferred out of the schools as the denominator, the unknown rate was 5.6 percent. The percentage of students with an unknown status is highest in the earlier grades (see Figure 5) in part because some students continue to be listed as unknown until their status is known or until their class graduates.

**Figure 5: Students with Unknown Status, Grades 9–12**

Note: These percentages were based on P-210 data for school year 2000-01 and excludes from the calculation the number of students categorized as having transferred out of a school.

# **SECTION A**

## **District and School Dropout and Graduation Statistics**

This section provides graduation, dropout, and unknown rates that are based on the total number of students reported by districts as graduates and dropouts during the school year (Form P-210) as the numerator and the October 2000 headcount enrollment (Form P-105) as the denominator. These are the rates used for federal reporting purposes. Section B provides these rates using data from Form P-210 for both the numerator and denominator.

# **SECTION B**

## **District and School Dropout and Graduation Statistics**

This section provides graduation, dropout, and unknown rates that are based on the total number of students reported by districts as graduates and dropouts on Form P-210 as the numerator and the total number of students reported by districts on Form P-210 minus those who transferred out of the school/district as the denominator.

	Grade 12					Grades 9 – 12

# **SECTION C**

## **County Dropout and Graduation Statistics**

This section provides graduation, dropout, and unknown rates that are based on the total number of students reported by districts as graduates and dropouts during the school year (Form P-210) as the numerator and the October 2000 headcount enrollment (Form P-105) as the denominator. These are the rates used for federal reporting purposes. Section D provides these rates using data from Form P-210 for both the numerator and denominator.

# **SECTION E**

## **District and School On-Time Graduation and Completion Statistics**

This section provides graduation and completion rates that are based on the total number of students in the Class of 2001 that were reported by districts using data from Form P-210 as both the numerator and denominator. Those who transferred out of the school/district have been eliminated from the denominator.

	Total (P210)	Student Transfers	Total Less Transfers	Completers					Percent
