**What else is there to know?**
This measure does not take into consideration a student’s final grade in the course or attainment of college credits, as this information isn’t collected by OSPI at this time.

**Why is Dual Credit included? Why does it matter?**
According to national research, in today’s world, 2/3 of all jobs require some post-high school training or education. Dual credit courses are rigorous classes taught in a college or high school that provide academically ready and interested students with the potential to earn high school and college credit and possibly get a head start on needed post-secondary training.

In addition, national research shows that taking dual credit is connected to higher high school graduation rates and grades, increased college enrollment and degree completion and improved student self-confidence related to succeeding in college.
