

NCLB Compliance Report 2006: Washington Schools in "Improvement" Status PRELIMINARY REPORT

Since the passage of the *No Child Left Behind Act* in 2001, the federal government has assumed a stronger role in education. This law clearly sets forth an expectation that all children achieve their state's academic standards and schools, districts and states be more accountable for student learning. Under this federal law, schools and districts that receive federal education dollars (Title I) and miss making achievement goals, commonly referred to as adequate yearly progress or AYP, face specific consequences. In our state, reading and math scores from the Washington Assessment of Student Learning are used to calculate AYP.

Schools are expected to make AYP in up to 37 different categories, and districts are evaluated in as many as 111 categories. Any school or district not making AYP for two consecutive years the same subject area (e.g., reading in 2005 and 2006) is identified for "improvement" status. And until AYP is achieved in every category for two years in a row, schools and districts continue to be identified as needing to improve. Making it one year and then missing the next means a school or district stays on the federal "improvement" list and restarts the two-year cycle of making AYP.

This **preliminary report** includes the names of all schools identified for federal "improvement" based on assessment data analyzed by OSPI. Many schools receive federal Title I education funds and therefore face federally-mandated consequences if they are in "improvement" status. Each school's Title I status is provided below.

While federal law may require our state to apply a specific definition of "needs improvement", our education system is based on the premise that *all* schools and districts strive to make continuous improvements to help students experience academic success.

OSPI will issue a final report detailing the AYP status of all schools and districts later this fall. Until that release, this list is considered to be preliminary. Those identified today have an opportunity to appeal their AYP determination and change their status.

Schools Exiting "Improvement" Status

A total of 20 school buildings made adequate yearly progress for their second consecutive year and are exiting school the federal improvement list: Heritage High (Evergreen-Clark); Sacajawea Middle (Federal Way); Amistad Elementary (Kennewick); Monticello Middle (Longview); Northwood Middle (Mead); Monroe High (Monroe); Omak Alternative High (Omak); Ballou Junior (Puyallup); Emerald Ridge High (Puyallup); Quincy High (Quincy); Roosevelt High (Seattle); Whitworth Elementary (Seattle); Cascade Middle (Sedro-Woolley); Centennial Middle (Snohomish); Sacajawea Middle (Spokane); Outlook Elementary (Sunnyside); Warden Elementary (Warden); White River High (White River); White River Middle (White River); and Nespelem Elementary (Nespelem).

Schools in Improvement

Step 1, School Improvement (126 schools)

Schools can be in Step 1 for three reasons: 1) they were in Step 1 last year and made AYP in 2006; or 2) they remain in Step 1 – even though they missed AYP – because they fell short in a different subject in 2006; or 3) they have not made AYP for two consecutive years and are entering Step 1 for the first time.

At the start of this school year, Title I schools in this category must notify the families of enrolled students about the opportunity to transfer their child to another school in the same district that is not in school improvement. Transportation costs (within federal parameters) will be covered by the school for families exercising this option.

Step 2, School Improvement (45 schools)

Title I schools that have reached Step 2 must continue to offer school choice and add the option for **low-income** students to receive tutoring services from an OSPI-approved supplemental service provider. Again, these options are only required to be offered by schools that receive Title I funds.

The schools in Step 2 are there this year because they 1) made AYP in 2006 and must make it again in 2007 to exit; or 2) were in Step 1 in 2005 and again missed AYP in the same subject in 2006; or 3) missed AYP in a different subject than in 2005 and do not move to the next step.

Step 3, School Improvement (65 schools)

At this point in school improvement, federal law expects districts to take a more direct role in addressing the academic struggles in a particular Title I building. School districts must take "corrective action," and they can choose from a number of options focused most often on curriculum and instruction changes that will improve student learning. These schools must continue to provide school choice options and supplemental services.

Step 3 schools are there this year because they 1) made AYP in 2006 and must make it again in 2007 to exit; or 2) were in Step 2 in 2005 and again missed AYP in the same subject in 2006; or 3) missed AYP in a different subject than in 2005 and do not move to the next step.

Step 4, School Improvement (4 schools)

Schools in this phase must continue school choice and tutoring options as well as follow the school district's chosen course of "corrective action." Working alongside the district, the school must also plan for "alternative governance" that could be implemented in the 2007-08 school year *if* the school continues to miss AYP in the same content area(s).

Yakima Yakima Lewis & Clark Middle School No 3 No 4 Yes Yes 13 4 76.5% M all, hispanic, low income ; OI

Step 5, School Improvement (8 schools)

This is the first year for Washington to have schools in Step 5. In this step, the school is required to institute "school restructuring" as defined in the school's restructuring plan. The school must provide documentation that at least one of the following actions has been taken:

- Replace school staff members, which may include the school principal, who are relevant to the school's inability to meet standards.
- Enter into a contract with an entity with a demonstrated record of effectiveness, to operate the school.
- Implement other restructuring activities that are consistent with the principles of restructuring.

The district must continue to provide technical assistance that emphasizes (a) the importance of improving instruction by using strategies grounded in scientifically-based research so that all students achieve proficiency in the core academic subjects of reading and mathematics, and (b) the importance of analyzing and applying data in decision-making. The school must also continue to offer public school choice and supplemental services to all eligible students.
