Barbara Thurman
Update of Activities:

- This is a really busy period. We are unveiling products, beginning new product development and preparing for conferences. Hopefully, we will get a little break during the summer but no guarantee:

- **New Tsunami/Earthquake Resource Book for Schools:**
  1. is on the street.
  2. We will showcase this at the AWSP Summer Conference and give a copy to those requesting a copy.
  3. A CD of the complete project is being printed and all schools will receive a copy during the Great Shake Out period.

- **Great Shake Out:**
  1. Schools are beginning to sign up as participants in the Great Shake Out. To date there are 11.
  2. Schools will receive their copy of the resource book at least a month prior to the October 18th drill.
  3. We are confirmed at the AWSP Summer Conference. We have a booth and will showcase the Great Shake Out for schools and other products as identified. EMD funded the booth at the conference.
  4. We are conducting a survey among a group of teachers and principals to decide what type of school contest to run during the Great Shake Out. Our intention is to do whatever is “user friendly” for the schools and teachers and still reward their emergency preparedness efforts.
  5. A letter to schools was developed by FEMA/EMD requesting participation in the Great Shake Out. I will leave a copy of the letter with Ruthy for each of you today.
  6. We are waiting on the letter endorsing the Great Shake Out from Randy Dorn, this will be posted on the OSPI/EMD website.
  7. Work continues between state and local Emergency Management directors as we coordinate the Great Shake Out.

- **“Defining the Terms” Video:**
  1. I have made a formal resource request from EMD for money to train on the new “Defining the Terms” video through a webinar,
  2. The request would also fund a hard copy piece to accompany the video. I await the availability of funds, way too early to forecast what will happen, should know in the next couple of weeks. If we are funded this will run concurrently with the Great Shake Out and be completed by March. Will keep you posted. If this occurs the project will be complete.
