Program Planning Guide
Title IV, Part A: Student Support and Academic Enrichment

Title IV, Part A is a flexible source of funding that can support a broad range of activities. By design, the program provides local educational agencies (LEAs) with considerable latitude to determine their most critical needs in the areas of:

- Providing all students with access to a well-rounded education;
- Improving school conditions for student learning; and
- Improving the use of technology in order to improve the academic achievement and digital literacy of all students.

This document is intended to provide LEAs with a short guide for developing their Title IV, Part A programs as required by ESSA. There are additional resources available on our website: www.k12.wa.us, or by contacting: Cara Patrick, Title IV, Part A Program Supervisor at cara.patrick@k12.wa.us, 360-725-6507.

1. **IDENTIFY LOCAL NEEDS**

All LEAs are encouraged to develop a thoughtful process for identifying student, staff, school, and community needs. A needs assessment is the most widely recognized approach for organizations of all kinds to prioritize and maximized limited resources.

**Needs Assessment (required for LEAs receiving at least $30,000)**

For LEAs that receive at least $30,000, a comprehensive needs assessment is required. Subsequently, a needs assessment should be completed at least once every three years.

During the needs assessment process for Title IV, Part A, LEAs should examine needs specifically related to the improvement of:

- Access to, and opportunities for, a well-rounded education for all students;
- School conditions for student learning to create a healthy and safe school environment; and
- Access to personalized learning experiences supported by technology and professional development for the effective use of data and technology.

A sample diagram of one possible needs assessment process is included on page three.

**Stakeholder Engagement (required for all LEAs)**

Regardless of whether an LEA uses a full needs assessment approach to program planning, all LEAs receiving Title IV-A funds are required to consult with a range of stakeholders during the design and development of its application. Such stakeholders must include, but are not limited to, the following:

- Parents
- Teachers
- Principals
- Students
- School leaders
- Specialized instructional support personnel
- Indian tribes or tribal organizations
- Community-based organizations
- Local government representatives
- Others with relevant and demonstrated expertise
Stakeholder engagement is important because it creates community buy-in and provides a broader perspective for planning, implementation, and continuous improvement. Title IV-A programs are meant to be coordinated with other schools and community-based services and may be conducted in partnership with external entities. This type of coordination and leveraging of local resources requires the engagement of a variety of stakeholders.

2. PLAN FOR IMPLEMENTATION

In form package 211 in the OSPI iGrants system, each LEA will submit a brief program plan and budget in order to access Title IV, Part A funds. As required by ESSA, the application must include a description of how funds will be used for activities, as well as a brief description of program objectives and intended outcomes.

Create a Program Logic Model

Once an LEA identifies the best use of Title IV-A funds through a needs assessment, it may choose to develop a “logic model” to document the thought process that links the planned activities with the intended outcomes.

A sample diagram of one possible logic model is included on page four.

Develop Measurable Objectives

OSPI is required to report to the public and to the federal government annually on how LEAs are using Title IV, Part A funds, including the degree to which they are making progress toward meeting the objectives and outcomes described in their program plans.

For each distinct set of activities under each Content Area (well-rounded, safe and healthy students, education technology), LEAs must develop at least one measurable objective.

A measurable objective/outcome generally has four components:

- **Subject.** Who is the target or focus of the activity? (e.g., students, teachers, parents, etc.)
- **Action.** What changed as a result of the activity? (e.g., increase knowledge, skills, attitudes, behaviors, or decrease behaviors, etc.)
- **Method/Instrument.** How will you assess the extent to which the change occurred? (e.g., attendance records, teacher surveys, Healthy Youth Survey, etc.)
- **Time period.** Over what period of time did the activity you are evaluating occur? (e.g., end of the school year, each quarter, etc.)

Find Resources, Ask for Help

Title IV, Part A is a new program, so it is likely that you will have questions and want to find content-related support. Please feel free to contact the Title IV, Part A Program Supervisor, Cara Patrick, at cara.patrick@k12.wa.us, or 360-725-6507 with any questions. In addition, the “Overview” document on the Title IV-A website includes a list of allowable activities as well as resources and contact information for content experts at OSPI – www.k12.wa.us/TitleIV.
Title IV, Part A: Student Support and Academic Enrichment
Sample Needs Assessment Process

A needs assessment process can help LEAs understand existing conditions in terms of gaps or challenges in services or activities, and formulate a strategy for addressing the need through the use of Title IV, Part A funds. All LEAs are encouraged to undertake a needs assessment process, but it is only a grant requirement for LEAs that receive at least $30,000 under Title IV, Part A.

The required needs assessment may incorporate programs and funds beyond just Title IV, A, but it must, at a minimum, examine needs related to the improvement of:

- Access to, and opportunities for, a well-rounded education for all students;
- School conditions for student learning to create a healthy and safe school environment; and
- Access to personalized learning experiences supported by technology and professional development for the effective use of data and technology.

Review Available Data
- Attendance
- Dropout/Graduation Rates
- Disproportionate Suspension/Expulsion
- School Climate Surveys
- Teacher/Staff Surveys
- Parent/Family Surveys
- Access to Enriched Curriculum
- Availability of Services
- Opportunities for College and Career Exploration
- Other

Identify Needs/Gaps/Challenges Related to Title IV, Part A Allowable Activities
- Programs
- Training
- Services
- Resources
- Equity
- Special Populations
- Learning Environment
- Other

Title IV, Part A: Student Support and Academic Enrichment
Sample Logic Model

A Logic Model can help LEAs plan program activities and resources in a way that allows them to test assumptions about how activities will accomplish the intended program goals.

**Inputs/Activities**
- Course development: new AP Biology course
- Professional learning: Trauma-informed practices
- Services: add staff time to provide school-based mental health services
- Curricula: stand-alone civics course materials
- Activities: afterschool Lego robotics

**Output(s)**
- 25 students enroll in new AP biology course
- 100% of staff trained in trauma-informed practices
- 20 additional hours per week of behavioral health counseling
- All high schools provide the required stand-alone civics course
- 20 students participate in robotics

**Intermediate Outcome(s)**
- At least 50% of AP Bio students take test
- At least 75% of trained staff implement practices
- Students receiving services increase attendance by 20%
- 75% of students demonstrate mastery of civics materials
- 50% students demonstrate increased interest in STEM

**Long-term Outcome(s)**
- Increased accelerated learning opportunities
- Improved school climate
- Decreased absenteeism rates across the district
- Students prepared for active citizenship
- Improved access to STEM learning
