

The National Assessment of Educational Progress (NAEP) assesses science in two major dimensions: Fields of Science (Earth, Physical, and Life) and Knowing and Doing Science (Conceptual Understanding, Scientific Investigation, and Practical Reasoning). The NAEP science scale ranges from 0 to 300. Scales are created separately for each grade.

Overall Science Results for Washington

- In 2005, the average scale score for eighth-grade students in Washington was 154. This was higher than their average score in 1996 (150).¹
- Washington's average score (154) in 2005 was higher than that of the nation's public schools (147).
- Of the 44 states and one jurisdiction that participated in the 2005 eighth-grade assessment, students' average scale score in Washington was higher than those in 22 jurisdictions, not significantly different from those in 10 jurisdictions, and lower than those in 12 jurisdictions.²
- The percentage of students in Washington who performed at or above the NAEP *Proficient* level was 33 percent in 2005. This percentage was greater than that in 1996 (27 percent).
- The percentage of students in Washington who performed at or above the NAEP *Basic* level was 66 percent in 2005. This percentage was greater than that in 1996 (61 percent).

Student Percentages at NAEP Achievement Levels

¹ Accommodations were not permitted for this assessment.
 NOTE: The NAEP grade 8 science achievement levels correspond to the following scale points: *Below Basic*, 142 or lower; *Basic*, 143–169; *Proficient*, 170–207; *Advanced*, 208 or above.

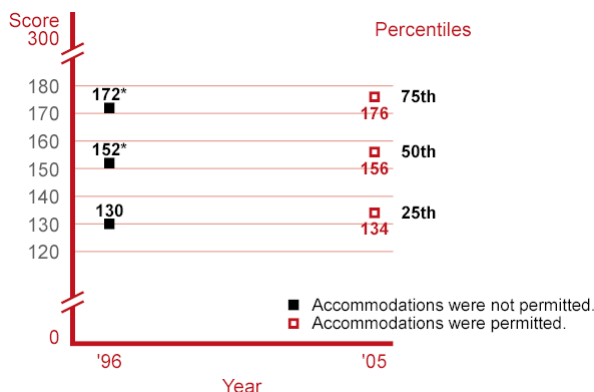

Performance of NAEP Reporting Groups in Washington: 2005

Reporting groups	Percent of students	Average score	Percent below <i>Basic</i>	Percent of students at or above <i>Basic</i>	Percent of students at or above <i>Proficient</i>	Percent <i>Advanced</i>
Male	51	155	34	66	36	4
Female	49	153↑	35	65	30↑	3↑
White	75	160↑	27↓	73↑	39↑	4↑
Black	5	137	54	46	15	#
Hispanic	10↑	128	69	31	8	1
Asian/Pacific Islander	7	149	39	61	26	3
American Indian/Alaska Native	2	135	61	39	15	1
Eligible for free/reduced-price school lunch	31↑	140	52	48	18	1
Not eligible for free/reduced-price school lunch	61↓	161↑	25↓	75↑	41↑	5↑

Average Score Gaps Between Selected Groups

- In 2005, male students in Washington had an average score that was not significantly different from that of female students. In 1996, there was no significant difference between the average score of male and female students.
- In 2005, Black students had an average score that was lower than that of White students by 23 points. In 1996, the average score for Black students was lower than that of White students by 29 points.
- In 2005, Hispanic students had an average score that was lower than that of White students by 32 points. In 1996, the average score for Hispanic students was lower than that of White students by 33 points.
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 21 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 20 points.
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 42 points. In 1996, the score gap between students at the 75th percentile and students at the 25th percentile was 42 points.

Science Scale Scores at Selected Percentiles

Scores at selected percentiles on the NAEP science scale indicate how well students at lower, middle, and higher levels performed.

The estimate rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2005.

↑ Significantly higher than 1996. ↓ Significantly lower than 1996.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Washington were 2 percent and 1 percent in 2005, respectively. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.

² "Jurisdiction" refers to states and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price school lunch and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
