

# SUMMARY OF FINDINGS

## 2012–13 OSPI-Developed Assessments

Social Studies, The Arts, Health, Fitness, and Educational Technology

### Purpose

This high-level synopsis captures school district-level use of the OSPI-developed assessments (or other assessment strategies) administered in Social Studies, The Arts, Health, Fitness, and Educational Technology during the 2012–13 school year in Washington state. Districts submitted their data to the Office of Superintendent of Public Instruction (OSPI) through the iGrants system.

### District Use & Reporting

As of August 31, 2013, over 98 percent of school districts (290 of 295) submitted the required state reports through the iGrants system to record the implementation of assessments or other strategies in Social Studies, The Arts, Health, Fitness, and Educational Technology. Although the report itself is mandatory, actual usage data — OSPI-developed or other assessment strategies — remains optional.

This table captures the high-level report data related to the use of OSPI-developed assessments or other strategies for Social Studies, The Arts, Health, and Fitness. The percent of districts reporting use of Educational Technology assessments includes only those that specifically implemented OSPI-developed Educational Technology assessments.

### Percentage of Districts That Use Assessments

	Social Studies*	Arts	Health	Fitness	Educational Technology
<b>Elementary</b>	95%	94%	91%	98%	27%
<b>Middle</b>	96%	94%	93%	98%	29%
<b>High</b>	99%	96%	96%	98%	26%

\*Represents an average for social studies and civics (reported separately).

The Office of Superintendent of Public Instruction is the primary agency charged with overseeing K–12 education in Washington state. Led by State School Superintendent **Randy Dorn**, OSPI works with the state’s 295 school districts to administer basic education programs and implement education reform on behalf of more than one million public school students.

# SUMMARY OF FINDINGS

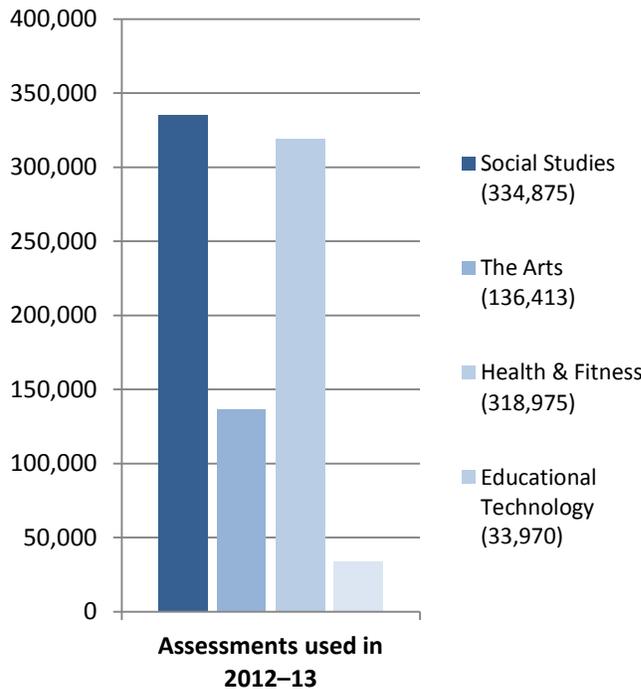

## 2012–13 OSPI-Developed Assessments

Social Studies, The Arts, Health, Fitness, and Educational Technology

Districts were asked to provide optional information that included how many and which specific assessments were administered.

- In 2011-12, 210 districts completed the optional information for one or more of the content areas for a total of 923,117 assessments administered.
- In 2012-13, 200 districts completed the optional information that indicated 824,253 assessments were administered.

While fewer districts completed the optional information in 2012-13, the data provided useful information about which assessments are being used and will guide how OSPI and state partners continue to support their implementation.

### Optional Survey

An optional survey was completed by 82 school districts (28 percent of those that reported). The survey collected feedback on the administration of assessments in these subjects at the district level.

Consistent themes among the comments included:

- The assessments help teachers have a common focus for their discussions and comparisons of student work and student's ability to demonstrate their knowledge and skills.
- The assessments provide consistency in our curriculum and ensure that the various elements are covered in the classroom.
- The assessments help us see what the actual performance of the standards looks and sounds like.
- The assessments help us have common expectations.
- These assessments have assured students get a well-rounded educational experience in our district.
- The assessments have made teachers aware of their responsibilities to collect evidence of student learning with some criteria.
- Time to collaborate and grade as a team remains the single biggest challenge for teachers.
- Districts would like to have more regional training opportunities available for teachers.
