## Smart Snacks Reference Sheet - Foods

The Smart Snacks in School standards require all foods sold on "school campus" during the "school day" to meet standards for fat, saturated fat, trans fat, sugar, and sodium while promoting products that have whole grains, low fat dairy, fruits, vegetables or protein foods as their main ingredient.

Follow the steps to determine if a food item meets the Smart Snacks standards.

## Step 1: Does the item meet one of the following exemptions?

- Fresh fruits and vegetables (with no added ingredients except water)
- Canned and frozen fruit (with no added ingredients except water or are packed in $100 \%$ juice, extra light or light syrup)
- Canned vegetables (with no added ingredients except water)
- NSLP/SBP entrée items* sold ala carte on day of OR day after service in NSLP/SBP
*Entrée item= a combination meat/meat alternate and whole grain-rich food; a combination fruit/vegetable and meat/meat alternate food; a meat/meat alternate food alone (with the exception of yogurt, cheese, seeds and nuts, or meat snacks); a whole grain rich food alone when served as a breakfast entrée.

## Step 2: Does the item meet ONE of the General Standards?

## Standard

- Whole grain rich grain product
- First ingredient is a fruit / vegetable / dairy product or protein food
- Combination food that contains at least $1 / 4$ cup of fruit and/or vegetable
- Contains $\geq 10 \%$ of the Daily Value for calcium, potassium, vitamin D, or dietary fiber (either naturally occurring or added)

## Notes

Must be $50 \%$ or more whole grains by weight or first ingredient must be a whole grain (OK if water is listed first)

Dried/dehydrated fruits or vegetables meets the general standards Exception: dehydrated or concentrated juice or puree is considered added sugar and does not meet the general standard

Combination food: Food that contains two or more components representing two or more of the food groups: fruit, vegetable, dairy, protein or grains Two items packaged together can be considered a combination food

This criterion becomes obsolete effective July 1, 2016

Item meets Smart Snack
standards - no need to evaluate further

Proceed to Step 2

Item does not meet Smart
Snack standards

Step 3: Does the item meet ALL of the Nutrient Standards?

## To calculate the percentage calories from fat

(choose either method - each method may provide slightly different results)

## Using the Calories from fat $\frac{\text { calories from fat }}{\text { total calories }} \times 100$

Using the Grams of fat $\frac{\text { grams of fat } \times 9}{\text { total calories }} \times 100$

To calculate the percentage of calories from Saturated Fat $\frac{\text { grams saturated of fat } \times 9}{\text { total calories }} \times 100$

To calculate the percent of sugar by weight

$$
\frac{\text { grams of sugar }}{\text { total weight of food in grams }} \times 100
$$
