

**School Bus Stop Violation Camera Systems Specification**  
**Effective: 11/7/2011**

**CAMERAS—(Optional)**

**Interior Cameras**

1. Cameras may be mounted in the front, side, back and/or mid-ship of the bus. If mid-ship, they must be mounted off center and over a seat back. Corners and sharp edges shall be rounded or covered with a protective material. If mounted on the windshield, they must not be in the Out of Service Area as referenced in the WSP Inspection Manual.
2. Recording equipment shall be mounted as not to produce any tripping hazard if floor mounted.

**Automated Safety Camera**

1. May be photo, micro-photo or electronic images.
2. Images must be legible in any lighting condition without use of visible flash.
3. Cameras may be mounted inside or outside the bus, if outside must not extend over six inches out from the side of the bus.
4. Shall verify the "STOP" sign is deployed and red lights are flashing at time of detection.
5. Shall capture the rear license plate, from either direction, at the time an illegally passing vehicle is detected.
6. May be located on the left and/or the right side of the bus.
7. Shall capture images only of the lanes immediately to the left and/or the right of the bus.
8. Shall not be driver activated or distract the driver during operation.
9. Shall not obstruct the driver's direct line of sight in any direction.
