6. **Number of beneficiaries (e.g., schools, students, districts) history:** N/A
7. **Programmatic changes since inception (if any):**
None.
8. **Evaluations of program/major findings:**
All work is in the maintenance phase of implementation.
9. **Major challenges faced by the program:** The proviso language in the current biennium is narrowly written compared to previous biennia. In previous biennia funds could be used for implementation of school finance system including technical staff, systems reprogramming, and workgroup deliberations, including the quality education council and the data governance working group. The current narrow language is effectively a funding cut to OSPI, as staff who are doing necessary agency work (for example, data governance) had to be moved to the agency’s administrative proviso, which was never sized to accommodate them.
