

Aligned Exit Dates

CEDARS Data Entry & Open Doors Youth Reengagement

Summary of problem

Are you seeing students appear on the CEDARS attributes and programs report but then not populating in the Youth Reengagement end of year (EOY) application? The most common reason for this is due to mis-matching exit dates.

Check the rules

The business rules used to populate students from CEDARS to the Youth Reengagement EOY application are:

1. Students who participate in a district managed program, whether the services are provided within the district or provided by a partnering provider, are "IsPrimary=Yes"
2. Students who participate in a consortium (ESD) are "IsPrimary=No" in their home/resident school
3. Students program record **start/exit dates** (if exited) are equal to or within the school enrollment

Exit date records

Compare the **School Enrollment** to the **Reengagement Program** enrollment dates. Below are snapshots from CEDARS that show a student's Reengagement Program record exit date is after the school enrollment date, which violates rule 3 above.

School Enrollment					
School	Enrollment Date	Exit Date	Days Present	School Choice Type	Primary School
Re-Engagement School Location id: 550	7/28/2021	6/17/2022 School exit is prior to program exit GO: Graduated with regular High School Diploma	180	Not Applicable	Yes

Reengagement Programs				
School	Resident District	Provider/Program	Start Date	Exit Date and Reason
Re-Engagement School Location id: 550	School District (55000)	Provider: ESD101/Spokane Falls CC/GWTC	7/28/2021	8/20/2022 Exit Reason: Graduated

Review the records for all students that are not populating to your end of year application to determine if they are not meeting any of the rules above.

If it is determined a student record needs to be updated to meet the parameters above, you will need to update the program record in your student information system (SIS) and submit a 2021-22 CEDARS submission.
