## Introduction and Overview

The 2022 COVID-19 Student Survey: Impacts and Implications on Student Learning and WellBeing (CSS) was a collaboration between the Washington Office of Superintendent of Public Instruction (OSPI) and the University of Washington's Center for the Study of Health and Risk Behaviors (CSHRB), designed to examine student needs and health risk behaviors during the second full year of the COVID-19 pandemic. The survey was intended to be administered online during school hours to students in grades 6 to 12 at all participating schools. Recruitment for the survey was initiated on January 10, 2022 and the survey was administered between February $1-28,2022$. The CSS was funded by OSPI and implemented by a team at CSHRB, with further partnership around content, design, and dissemination from OSPI. This survey represents a oneyear follow-up effort to a survey that also involved collaboration with Washington State Health Care Authority and the Washington State Department of Health.

Rationale: On February 29, 2020, Governor Jay Inslee issued Proclamation 20-05 declaring a State of Emergency in response to the looming threat of the COVID-19 virus. On March 13, 2020, as the threat grew, Governor Inslee ordered statewide in-person school closures of all K-12 schools. In the two years since, COVID-19 has continued to present high levels of risk of infection, and Washington state and school districts have responded to these risks by implementing requirements from moving to remote/virtual or hybrid instruction to requiring distancing and masks for in-person instruction. The March 2021 survey was initially designed to help schools collect information about student experiences over the largely virtual year of instruction; this February 2022 survey was designed to provide educators and administrators with a window into student needs and potential challenges facing students and schools with the return to largely in-person instruction as Washington looks to emerge from the pandemic and associated restrictions. The CSS team selected questions/items that were most associated with student wellbeing from other longstanding, well-validated youth studies, as well as items generated by educators and novel items pertaining to COVID-19.

Report Content: This report presents students' responses to all survey questions and are shown as frequencies separated by grade. It focuses on COVID-19-specific attitudes and behaviors, school experiences and engagement, health and safety, mental health and support, and substance use. Items are grouped by topic and are not presented in the order that they were asked on the survey.

## How to Read the Report

Below is an example of a typical bar chart. This is a graphical representation of survey data and can be found throughout this report's Key Findings. Each bar corresponds to a percentage of students who selected a particular response or range of responses. Relevant components of this figure are labeled and annotated to assist the reader in understanding how to interpret the chart.

A. Survey Item: This is the item (or single option within a series of items), as viewed by students.
B. Title of Figure: A brief description of the content of the figure.
C. Scale: This provides an easy reference for comparing bars. Note: This is usually displayed on the Y -axis (vertical axis) but this may be flipped on charts to appear on the X -axis (horizontal axis) to better visually represent the data.
D. Value: This expresses the specific value (as a percentage) for a particular response and category.
E. Category: This describes the particular population providing a response to the survey item. This will either be a particular grade or the total responses. Note: This is typically displayed on the $X$-axis but may be flipped to better visually represent the data on the Y axis in some figures.

Below is an example of a frequency table for a specific item (edited for space considerations) with relevant components labelled and annotated.

A. Survey Item: This is the item (or single option within a series of items), as written and read by students.
B. Category Heading: This includes the category of students responding and the number of valid responses ( n ). It also indicates that the numbers below will consist of a specific value (\%) and a confidence interval (CI).
C. Response Values: Each row corresponds to a different and valid student response.
D. Percentage: The percentage of students within a particular category who indicated a specific response.
E. Confidence Interval: This represents the $95 \%$ confidence interval around a particular estimate. See Technical Notes for a definition of confidence intervals.

## Technical Notes

## Survey participation in this report

|  | Grade | Grade | Grade | Total* |
| :--- | :---: | :---: | :---: | :---: |
| Number of Valid Responses | 6 | 7 | 8 |  |
| Number of Schools Participating** | 2650 | 2802 | 2447 | 7899 |

[^0]
## School Participation

A total of 116 eligible schools elected to participate in the Covid-19 Student Survey. This included 48 high schools (defined as containing only students in grade 9 through 12), 48 middle schools (defined as any school containing students up to grade 8), and 20 schools with students in both middle and high school grade ranges in the same building/school. Participating schools were from 58 different School Districts in Washington.

## Caution about Generalizing Findings

The decision to participate in this survey was left up to each school. All students in eligible grades were invited to participate but that does not mean that every student did. Therefore, this is a convenience sample and is not intended to be generalizable to the state population. In this convenience sample, some types of schools and some types of students may have disproportionately decided not to participate, resulting in some bias in the data. This report contains demographic information about respondents (e.g., grade, race and ethnicity, gender) that will provide some indication of who has elected to participate. Even so, it is important to be thoughtful in how you interpret and use these results.

NOTE: No weighting has been done in frequency reports for the 2022 CSS. When framing the results, you may consider using language such as:

- "25\% of 10th grade students who completed the 2022 CSS reported..."
- "Among students in 12th grade who took the 2022 CSS, 15\% said that..."
- "Worries about ... were reported by $10 \%$ of participating students..."

It is also important to use caution when making any comparisons between the results of this survey and results from other surveys, like the Healthy Youth Survey (HYS) and even last year's COVID Student Survey. There may be differences not only in which schools participated in a particular region, but also which grades were included, completeness in the survey responses, and the proportion of students who participated. While some of these differences are easier to define, some may be harder to explain. For example, the pandemic may have affected how some communities, age groups, and individual students may have participated in the survey differently than others.

## Bias Reduction and Data Cleaning

While instructions indicated that surveys were to be completed during school hours, it is important to note that the anonymous nature of responses coupled with the fact that the link to the survey could be copied and shared with others may have resulted in some students taking the survey outside of school hours. It could also mean that individuals who were not enrolled in a school could have gained access to and even completed the survey.

To address the concern of invalid survey responses, we have taken certain steps to clean the data to ensure they accurately reflect the opinions of participating students. For example, we have applied a series of quality control checks to identify and remove students who may not have answered honestly (e.g., responded with illogical patterns) as well as survey responses that were determined to likely be falsified (e.g., not a student). While we have cleaned the data to the best of our ability, there is still the risk that some of these invalid survey responses were not removed.

## Interpretation and Confidence Intervals

Percentages based upon survey data can sometimes be tricky to interpret. The data in the CSS are not part of a "random sample" of students, so when we look at the results we should not necessarily assume that they represent all students in Washington state or even in a school. However, these data can tell us about the students who participated.

Even when a survey is perfectly designed and administered, it is rare that the results you see are an exact measure of the population. Unless every single person in a population (e.g., a school) participates then the results are not going to be exact. So, to address this lack of precision we use confidence intervals along with a single percentage or "point estimate." We see this frequently in the use of polls where the poll responses are given with a "margin of error." Responses in this report are presented as a percentage (i.e., a point estimate) and we provide a margin of error (i.e., a confidence intervals) around that percentage. This report utilizes 95\% confidence intervals. This means that the "true" response to a survey question is found within a bounded range $95 \%$ of the time. Here is an example that mirrors what will be seen in this report:

| What is your preferred flavor of ice cream? | Grade 9 <br> $\%(\mathrm{CI})$ | Grade 10 <br> $\%(\mathrm{CI})$ |
| :--- | :---: | :---: |
| Strawberry | $80.4 \%( \pm 3.5)$ | $66.7 \%( \pm 4.2)$ |
| Vanilla | $19.6 \%( \pm 2.0)$ | $33.3 \%( \pm 2.5)$ |

In this hypothetical example, we estimate that $80.4 \%$ of 9 th graders prefer strawberry and the inclusion of the $\pm 3.5 \%$ confidence interval tells us that there is a $95 \%$ probability that the true percentage of 9 th grade students who prefer strawberry is between $76.9 \%$ and $83.9 \%$. Similarly, if we look at 10th grade students we see that we estimate that $66.7 \%$ prefer strawberry ice cream. The $95 \%$ confidence interval of $\pm 4.2$ indicates that there is a $95 \%$ probability that the true percentage of 10th graders that prefer strawberry is between $62.5 \%$ and $70.9 \%$. Confidence intervals also permit us to determine whether estimates are significantly different from one another. As a conservative rule, if the two confidence intervals do not overlap, we can conclude that there is a statistically significant difference in the two population values at the given level of confidence. In this example, we can say with $95 \%$ certainty that significantly more 9th grade students prefer strawberry ice cream compared to 10th grade students.

## Key Findings

## COVID-19 Diagnoses

As of February, 2022, over 78 million cases of COVID-19 had been confirmed in the United States, over 1.4 million in Washington state. The two items on this page separately assess the extent to which students reported that they/their families have been personally affected by a positive COVID-19 diagnosis. (Note: These items can be found in the frequency report here)

Have you ever tested positive for COVID-19?

Has anyone you live with ever tested positive for COVID-19?

## COVID-19 Worries

The team wanted to document the degree to which the COVID-19 pandemic has created concerns and worries that may be affecting students. For the following items, we asked students how much they were worried right now about different potential consequences of the COVID-19 pandemic. These two items show the percent of students who reported being 'pretty worried' or 'extremely worried' about these things. (Note: These items can be found in the frequency report here)

Getting sick with COVID-19:

Note: Figure includes responses indicating student was "pretty worried" or "extremely worried."
Your friends or family getting sick with COVID-19?

Note: Figure includes responses indicating student was "pretty worried" or "extremely worried."

## COVID-19 Protective Strategies

One potential safety concern as students largely returned to in-person instruction included how well students would adhere to safety guidelines that reduce the transmission of COVID-19. The following questions asked students how well they followed CDC guidelines during the past 30 days. We report the percentage of students that reported following these guidelines 'most of the time' or 'all the time' in the past 30 days. (Note: These items can be found in the frequency report here)

Washing your hands or using hand sanitizer between activities:

Note: Figure includes responses indicating student was following guidelines "most of the time" or "all of the time."
Wearing a mask when you are near people you don't live with:

Note: Figure includes responses indicating student was following guidelines "most of the time" or "all of the time."

Staying home when you feel sick:

Note: Figure includes responses indicating student was following guidelines "most of the time" or "all of the time."

## COVID-19 Health Behaviors at School

A potential concern for schools and communities when students returned to the classroom was whether students would continue to attend school when they felt ill or disclose unsafe health behaviors they observed. This section includes items that describe whether students would disclose their own illness or any unsafe behaviors of others. (Note: These items can be found in the frequency report here)

Would you tell your teacher or parent/guardian if you felt sick?

Note: Figure includes responses indicating "Definitely yes" or "Probably yes."
If you saw one of your peers doing something that wasn't safe with regard to COVID-19, would you talk with them about it?

Note: Figure includes responses indicating "Definitely yes" or "Probably yes."

If you saw one of your peers doing something that wasn't safe with regard to COVID-19, would you talk to an adult or teacher about it?

Note: Figure includes responses indicating "Definitely yes" or "Probably yes."

## School Experiences

The team assessed the degree to which students felt the COVID-19 pandemic had disrupted their experiences in school as well as the degree to which it had an impact on student engagement. When present, the effects of this disruption and the ongoing pandemic on student learning and performance are unknown and may vary between students. The items on this page ask students to reflect on how their learning and performance has been affected during the course of the pandemic. (Note: These items can be found in the frequency report here)

Think back over this school year so far. How often did you feel the schoolwork you were assigned was meaningful and important?

Note: Figure includes all who responded "A lot" "Most" or "All of the time."
Think back over this school year so far. How often did you think that your classes were interesting to you?

Note: Figure includes all who responded "A lot" "Most" or "All of the time."

In the past school year, how often have you felt a sense of belonging at your school? (Note: These items can be found in the frequency report here)

Note: Figure includes responses indicating "Often" or "Very often."
How much do you feel you have learned across all of your classes this school year, compared to last school year? (Note: These items can be found in the frequency report here)

## Hope and Optimism

Hope is an important construct in children as research has linked it with overall physical, psychological, and social wellbeing. Four items from the Children's Hope Scale (Snyder, 1997) were included in this survey. Children who can identify a means to carry out goals and who can initiate and sustain action toward goals are considered more hopeful. (Note: The Hope Scale is constructed of four survey items and the frequency report for these items can be found here)

Students rated each of the Hope items on a six-point scale from "none of the time" (value of 1) to "all of the time" (value of 6 ). Hope scale scores could range from a low of 4 to a high of 24. A score of 4 to 8 indicates "no to very low" hope, a score of 9 to 12 indicates that a student is "slightly hopeful", a score of 13 to 16 indicates that a student is "moderately hopeful", and a score of 17 to 24 indicates that a student is "highly hopeful".

Note: Hopefulness based upon an abbreviated, 4-item, Children's Hope Scale (Snyder, 1997).

Similarly, having an optimistic outlook is a strong indicator of resilience. The following shows the percentage of students who reported being optimistic or hopeful about their future 'a lot of the time', 'most of the time', or 'all of the time':

Note: Bars include all who reported feeling optimistic / hopeful "a lot", "most", or "all of the time."

## Mental Health and Wellbeing

Student mental health and wellbeing has been a critical concern during the COVID-19 pandemic. As such, schools are interested in how their students have been doing during this time. The following section reports on topics related to mental health (both adverse and positive topics):

The next figure describes the percentage of students who reported feeling sad, depressed, or hopeless during the past 12 months. (Note: Frequency reports for mental health items can be found here)

During the past 12 months, have you felt depressed or sad MOST days, even if you felt OK sometimes?

During the past 12 months, did you ever seriously consider attempting suicide?

NOTE: Any student that indicated suicidal ideation during the past 12 months immediately received a supportive response and list of developmentally appropriate resources.

## Mental Health Services

This survey asked about students' access to mental health services. These figures are generated from two items. The first figure considers all responses. The next two figures include only responses of those who indicated that they needed services. (Note: Frequency reports for mental health services can be found here)

During the past 12 months, did you need mental health services from a counselor, therapist, emergency room, or other health care provider?

During the past 12 months, did you try to get mental health services from a counselor, therapist, emergency room, or other health care provider?

Of those who did try to get mental health services, these percentages show whether students were successfully able to receive services:

## Social Support

Social support can serve as one important protective factor against adverse life events such as the disruption caused by the COVID-19 pandemic. Given this, we examined the extent that students felt socially supported during the past 12 months. Below we present two figures summarizing peer and adult support. (Note: These items can be found in the frequency report here and here, respectively)

In the past school year, how often have you felt supported by your friends or classmates?

Note: Figure includes responses indicating "Often" or "Very often."
Are there adults you can turn to for help or support?

## Frequency Results

## Demographics

$\left.\begin{array}{lccc}\text { Are you Hispanic/Latino/Latina/Latinx? } & \begin{array}{c}\text { Grade } \\ (\mathrm{n}=2526)\end{array} & \begin{array}{c}\text { Grade } \\ (\mathrm{n}=2710) \\ \%(\mathrm{Cl})\end{array} & \begin{array}{c}\text { Grade } 8 \\ (\mathrm{n}=2380) \\ \%(\mathrm{CI})\end{array} \\ \hline \text { ( } \mathrm{n}=7616) \\ \%(\mathrm{Cl})\end{array}\right)$

|  | ( $\pm 1.5$ ) | ( $\pm 1.5$ ) | $( \pm 1.6)$ | $( \pm 0.9)$ |

| During the past 30 days, on how many days have you been absent from school for any reason? Include any days that you missed at least half of the school day. | $\begin{gathered} \text { Grade } 6 \\ (\mathrm{n}=2233) \\ \%(\mathrm{Cl}) \end{gathered}$ | $\begin{gathered} \text { Grade } 7 \\ (\mathrm{n}=2362) \\ \%(\mathrm{Cl}) \end{gathered}$ | $\begin{gathered} \text { Grade } 8 \\ (\mathrm{n}=2105) \\ \%(\mathrm{Cl}) \end{gathered}$ | $\begin{gathered} \text { Total } \\ (\mathrm{n}=6700) \\ \%(\mathrm{CI}) \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: |
| 0 times | 36.9\% | 34.3\% | 33.2\% | 34.8\% |
|  | ( $\pm 2.0$ ) | $( \pm 1.9)$ | ( $\pm 2.0$ ) | ( $\pm 1.1$ ) |
| 1 or 2 days | 30.6\% | 34.2\% | 34.3\% | 33.0\% |
|  | ( $\pm 1.9$ ) | ( $\pm 1.9$ ) | ( $\pm 2.0$ ) | ( $\pm 1.1$ ) |
| 3 or more days | 32.5\% | 31.5\% | 32.5\% | 32.2\% |
|  | $( \pm 1.9)$ | $( \pm 1.9)$ | ( $\pm 2.0$ ) | ( $\pm 1.1$ ) |

Note: Percentages may not sum to $100 \%$ as participants could select more than one response. Also note that the potential reasons for being absent were only asked of those students who had indicated they were absent at least once in the past 30 days. This question contains twelve response options and is continued on the next page. Response options appear in the order they appeared on the survey.

| Please select reasons why you have been absent from school in the past 30 days (select all that apply): | Grade 6 $\begin{gathered} (\mathrm{n}=1409) \\ \%(\mathrm{Cl}) \end{gathered}$ | $\begin{gathered} \text { Grade } 7 \\ (\mathrm{n}=1553) \\ \%(\mathrm{Cl}) \end{gathered}$ | Grade 8 $\begin{gathered} (\mathrm{n}=1406) \\ \%(\mathrm{CI}) \end{gathered}$ | $\begin{aligned} & \text { Total } \\ & (\mathrm{n}=4368) \\ & \%(\mathrm{Cl}) \end{aligned}$ |

## Mental Health and Support

During the past 12 months, have you felt depressed or sad MOST days, even if you felt OK sometimes?

|  |  | $\%(\mathrm{Cl})$ | $\%(\mathrm{Cl})$ | $41.6 \%$ |
| :--- | :--- | :--- | :--- | :--- |
| Yes | $41.7 \%$ | $45.3 \%$ | $42.8 \%$ |  |
|  | $( \pm 1.2)$ |  |  |  |
| No | $( \pm 2.2)$ | $( \pm 2.1)$ | $( \pm 2.2)$ | $58.4 \%$ |
|  | $( \pm 2.2)$ | $( \pm 2.1)$ | $( \pm 2.2)$ | $( \pm 1.2)$ |

NOTE: The next three questions refer to suicidal ideation and attempted suicide. Any student that responded in the affirmative to any of these three items received a list of support resources.

| During the past 12 months, did you ever seriously consider attempting suicide? | $\begin{gathered} \text { Grade } 6 \\ (\mathrm{n}=1977) \end{gathered}$ | $\begin{gathered} \text { Grade } 7 \\ (n=2113) \end{gathered}$ | $\begin{gathered} \text { Grade } 8 \\ (n=1897) \end{gathered}$ | Total $(n=5987)$ |
| :---: | :---: | :---: | :---: | :---: |
|  | \% (CI) | \% (CI) | \% (CI) | \% (CI) |
| Yes | 13.9\% | 13.9\% | 19.5\% | 15.6\% |
|  | ( $\pm 1.5$ ) | ( $\pm 1.5$ ) | ( $\pm 1.8$ ) | ( $\pm 0.9$ ) |
| No | 86.1\% | 86.1\% | 80.5\% | 84.4\% |
|  | ( $\pm 1.5$ ) | ( $\pm 1.5$ ) | ( $\pm 1.8$ ) | $( \pm 0.9)$ |

During the past 12 months, did you make a plan about how you would attempt suicide?

$\left.\begin{array}{lccc}\text { During the past } 12 \text { months, did you actually attempt suicide? } & \begin{array}{c}\text { Grade } 6 \\ (n=1981)\end{array} & \begin{array}{c}\text { Grade } \\ (n=2113) \\ \hline\end{array} & \begin{array}{c}\text { Grade } 8 \\ (n=1893)\end{array} \\ & (n=5987) \\ \%(C I)\end{array}\right)$

During the past 12 months, did you need mental health services from a counselor, therapist, emergency room, or other health care provider?

| Grade 6 <br> $(\mathrm{n}=1362)$ <br> $\%(\mathrm{CI})$ | Grade 7 <br> $(\mathrm{n}=1458)$ <br> $\%(\mathrm{CI})$ | Grade 8 <br> $(\mathrm{n}=1228)$ <br> $\%(\mathrm{CI})$ | Total <br> $(\mathrm{n}=4048)$ <br> $\%(\mathrm{CI})$ |
| :---: | :---: | :---: | :---: |
| $16.4 \%$ | $19.4 \%$ | $24.6 \%$ | $20.0 \%$ |
| $( \pm 2.0)$ | $( \pm 2.0)$ | $( \pm 2.4)$ | $( \pm 1.2)$ |
| $83.6 \%$ | $80.6 \%$ | $75.4 \%$ | $80.0 \%$ |
| $( \pm 2.0)$ | $( \pm 2.0)$ | $( \pm 2.4)$ | $( \pm 1.2)$ |

Note: The next item was only asked of respondents if they indicated 'yes' on the previous question regarding needing mental health services.

| Do you think it's ok to seek help and talk to a professional counselor, therapist, or doctor if you've been feeling very sad, hopeless, or suicidal? | $\begin{gathered} \text { Grade } 6 \\ (n=1963) \end{gathered}$ | $\begin{gathered} \text { Grade } 7 \\ (\mathrm{n}=2130) \end{gathered}$ | $\begin{gathered} \text { Grade } 8 \\ (n=1896) \end{gathered}$ | Total $(n=5989)$ |
| :---: | :---: | :---: | :---: | :---: |
|  | \% (CI) | \% (CI) | \% (CI) | \% (CI) |
| Yes | 78.5\% | 79.9\% | 80.6\% | 79.7\% |
|  | ( $\pm 1.8$ ) | ( $\pm 1.7$ ) | ( $\pm 1.8$ ) | ( $\pm 1.0)$ |
| No | 21.5\% | 20.1\% | 19.4\% | 20.3\% |
|  | ( $\pm 1.8)$ | ( $\pm 1.7)$ | ( $\pm 1.8)$ | ( $\pm 1.0)$ |

How often do you feel...
$\left.\begin{array}{lcccc}\text { Lonely } & \begin{array}{c}\text { Grade } 6 \\ (n=2047)\end{array} & \begin{array}{c}\text { Grade } 7 \\ (\mathrm{n}=2179)\end{array} & \begin{array}{c}\text { Grade } 8 \\ (\mathrm{n}=1944)\end{array} & \begin{array}{c}\text { Total } \\ (\mathrm{n}=6170)\end{array} \\ \hline \text { \%(CI) }\end{array}\right)$

[^0]:    *Students that selected "ungraded or other" and those who indicated a grade that did not exist at their school (e.g., student attending a middle school who reported being in grade 12) were excluded from this report. These accounted for a small portion of all survey responses (0.85\%).
    ** Participating schools were defined as a school that administered the survey to students and who had students enrolled in at least one of the specified grades based on 2021-2022 school data from OSPI.
