

FAMILIES ARE OUR PARTNERS IN EDUCATION

Academic success starts at home and it consolidates at school, with the continuous partnership and support of families. Families and schools must build trusting relationships and keep ongoing two-way communication for the partnership to work.

School has a welcoming learning environment to engage all families. Families are aware of opportunities to participate in school-related activities.

Family provides an environment supportive of developmental needs of children. The student builds awareness of the importance of education.

Teachers and parents share student concerns of the whole child. Families are ready to support the education of their child in the classroom in different ways.

LEA and families recognize the importance of school-family partnerships in school improvement efforts. Both know that families' perspectives can help the school system in their efforts to increase student academic success.

The LEA identifies and integrates community resources to enhanced school programs. Families use community programs to increase child's skills, talents and/or obtain needed services.
